Project: Personal Website

Contributors:

Nuoyan Wang

Description:

- **Utilized html/css/javascript to create an animated personal website that is responsive to varying screen sizes and users.**

- Website includes links to various files and websites relevant to my portfolio, as well as an "Extras" highlighting my personal side. Site visitors can see my personal info, projects, skills, and contact me directly from the site.

- Learned new technologies to deploy a website with my own URL via github pages.
